## Data Sheet

## Bria Android Edition

*The power of Bria on your Android device*

Bria Android Edition is a highly secure, standards-based mobile VoIP softphone that allows you to make calls over both 3G and Wi-Fi networks. Take the power of your favorite desktop softphone with you - at work, at home or anywhere in-between.

### Advanced User Interface

Bria Android Edition's intuitive user interface provides:

- Seamless integration with CounterPath's desktop softphones
- One-touch access to call management options such as voicemail, call history and speakerphone
- Support for 4-digit dialing
- The option to purchase and sync premium add-ons such as G.729
- Auto-attendant support

### PBX Extension

Bria Android Edition becomes an extension to your PBX! As an increased number of business professionals are using the collaborative tools found in smartphone devices to aid in their work activities, Bria Android Edition offers businesses an easy way to integrate their enterprises' voice solution within the Android product line.

### Security

As voice communications have become more vulnerable to the same type of attacks that data has endured over the past two decades, enterprises are constantly trying to ensure that any software deployments are protected from vicious malware and viruses. Unlike other SIP-phone providers, with CounterPath's Bria Android Edition, you can take comfort that your calls are secure with advanced TLS and SRTP.

### Multiple Call Support

With multiple call support, users can quickly and easily handle incoming multiple calls, merge and split calls apart, and place users on hold with a simple tap to the user interface. The Android SIP client leverages the award-winning usability from CounterPath's desktop softphone to enable dynamic call handling and increased productivity. With Bria Android Edition, it's like taking your deskphone on the road.

### Where to Buy
