# Bria iPad Edition Data Sheet

## Bria iPad Edition

*The next step in the deskphone revolution*

Bria iPad Edition is a highly secure SIP-based softphone specifically designed for the Apple iPad and iPad 2. With Bria iPad Edition you can make and receive calls using a Wi-Fi or 3G/4G connection, or purchase premium features like presence and messaging to connect with contacts on Google Talk, Facebook and more!

### Advanced User Interface

#### Bria iPad Edition's intuitive user interface provides:

- One-touch access to call management options such as voicemail, call history and speakerphone
- Separated navigation panes for easy access to tabs and content
- Popover dial pad is stylishly minimized but easily accessible at all times
- Auto-attendant support

### PBX Extension

Bria iPad Edition becomes an extension to your PBX! As an increasing number of business professionals are using the collaborative tools found in tablet devices to aid in their work activities, Bria iPad Edition offers businesses an easy way to replace their deskphone or integrate their enterprises' voice solutions within the Apple iOS family.

### Multitasking Support

Multitasking functionality allows Bria iPad Edition to run in the background while you use your iPad, allowing you to reference other applications while on a call.

### Security

As voice communications have become more vulnerable to the same type of attacks that data has endured over the past two decades, enterprises are consistently trying to ensure that any software deployments are protected from vicious malware and viruses. Unlike other SIP-phone providers, with CounterPath's Bria iPad Edition you can take comfort that your calls are secure with advanced TLS and SRTP. Bria iPad Edition brings the same strength and protection offered in our Bria desktop softphone to your mobile device.

### Premium Features

Want more than just voice calling? Bria iPad Edition includes premium feature add-ons that can be purchased within the client. Simply go to the Premium Features button under the Settings tab to learn more about adding presence and messaging to your softphone or boosting your audio quality over 3G with a G.729 audio codec.

### Where to Buy

The commercial version of Bria iPad Edition is available on the Apple iTunes Store. For customized versions of Bria iPad Edition, contact your CounterPath sales representative for more information (bulk purchases only).

# Bria iPad Edition

The next step in the deskphone revolution
