

Yealink's newest Microsoft Teams offering

The 16th March marked a new development in Yealink's portfolio of huddle room solutions, with the release of the VC210 Video Collaboration Bar.

Designed for small meeting rooms and huddle spaces, the VC210 provides a fully integrated Microsoft Teams experience, while giving a premium video and voice quality experience.

An ultra 4K camera sits front and centre with a 120-degree field of view, allowing everyone within the meeting room to be captured without the need for participants to be cramped together.

Getting started is simple with a quick plug-in setup to get end users connected as quick and easy as possible.

Seamless setup and picture quality are all very well and good. But if you don't have the audio to back it up it, collaboration becomes incredibly tricky. That's why the VC210 is perfectly partnered with the CP900 speakerphone allowing for exceptional audio clarity with a radius of up to 2 metres away.

Overall, the Yealink VC210 gives an updated and leading immersive audio/ visual offering to the UC channel.
